Ideal natural conditions for growing tea

"Okriba" tea plantations are planted in Imereti Region, in the mountainous area of Tkibuli municipality. The favorable location, together with the unique climatic conditions, enriches the tea grown here with the best taste qualities.

The company uses both traditional and modern technologies of picking and processing tea and creates a range of teas with an unforgettable taste and invigorating aroma, thus gaining a reputation as one of the best teas in Georgia.

Tkibuli zone:

- Abundant precipitation (1373 mm annually); 400-800 m above sea level;
- soil rich in minerals;
- Unique temperature variation:
- -10 +30c degrees

Georgian tea Buetea

The tea grown naturally on the highland plantations of the company "Okriba" does not contain pesticides and herbicides.

During harvesting, the tea leaves and pods are carefully picked and then twisted, resulting in an exceptionally rich, aromatic and delicious quality tea that is useful and enjoyable to drink.

An aerial photograph of a tea plantation on a hillside. The tea bushes are arranged in neat, diagonal rows. Several workers are visible, bent over and picking the tea. In the background, there are some buildings and a dense forest on the hillside.

Plantations

The company owns 55 hectares of tea plantations (in Tsutskhvati village and Bueti village)

During the season, tea is picked according to the order on the area required by the order quantity.
