

Persimmon

SPIRITS

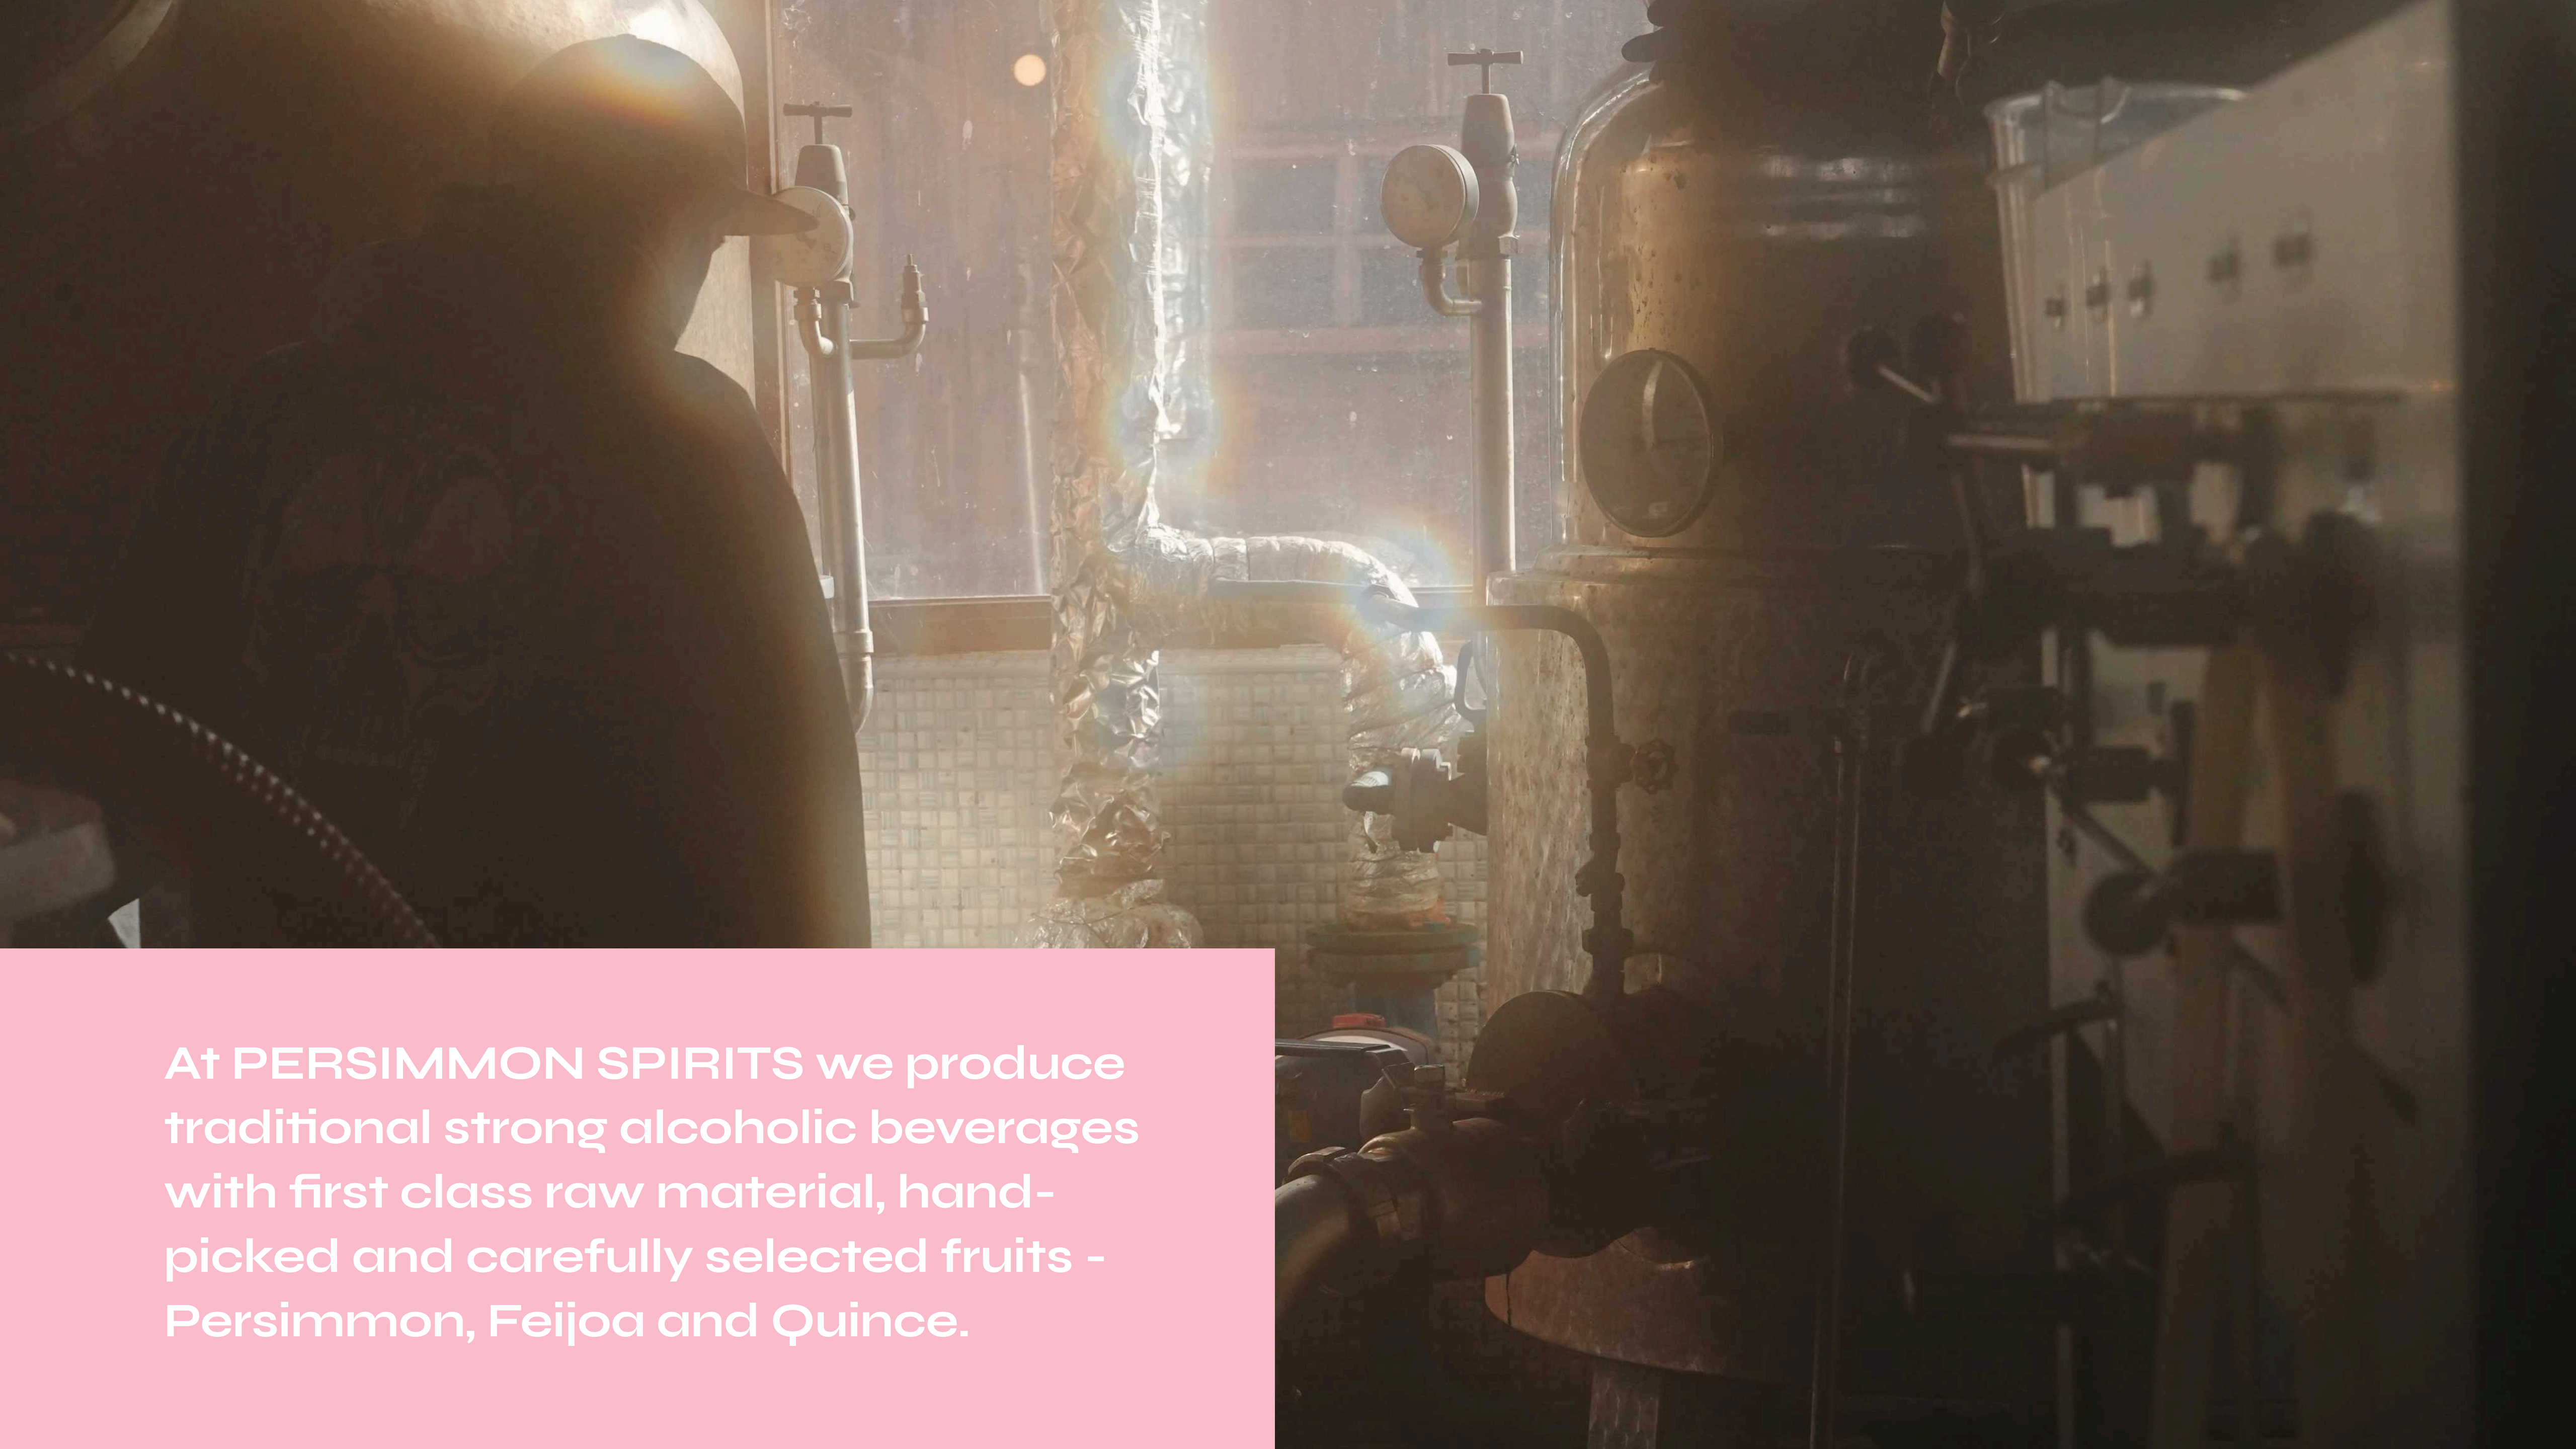

Georgia has been preserving the mystery of winemaking and spirit distillation for thousands of years, and we are proud to continue these traditions in our homeland and share our products with the rest of the world.

RAW

We cultivate a variety of fruits in Georgia using natural methods, pick them carefully and at the peak of ripeness prepare for fermentation and future distillation.

At PERSIMMON SPIRITS we produce traditional strong alcoholic beverages with first class raw material, hand-picked and carefully selected fruits - Persimmon, Feijoa and Quince.

Each bottle of **PERSIMMON** Spirit only contains fruits, no added sugar or artificial ingredients, product have only natural flavors and aromas.

Our pure fruit spirits are distilled twice and only HEART CUT is taken on average of 80%. Spirits are diluted with purified spring water and bottled at 42%.

PERSIMMON Spirits are made for people who appreciate pure spirits, for bar managers who love art and craft of mixing drinks, for restaurants who seek to impress their guests...

Our warm-up drinks are often served in shots and are used as a base spirit in craft cocktails with natural ingredients
