

CHÂTEAU ȚUERA

GEORGIA

HOMELAND OF WINE

Traces of the centuries-long history of Georgian winemaking can be found in scientific, literary or historical works, legends and archeological materials.

For at least 8000 years, the vine cares symbolic and sacred meaning for the Georgian people. All the legends clearly show that for Georgians winemaking and wine drinking has always been a certain form of art.

CHÂTEAU BUERA

Perched atop sprawling Kakhetian vineyards, Château Buera is a charming family-owned winery overlooking magnificent Caucasus Peaks. Buera vineyards enjoy premium location near Lopota Lake and produce a variety of Georgian and French grapes including Kisi, Mtsvane, Rkatsiteli, Saperavi, Cabernet, Chardonnay and Merlot. A recent addition to the collection is a Georgian indigenous Buera variety, after which the winery is named.

Winemaking, expanded vineyards and a fabulous Renaissance-style palace. Château Buera is a distinguished place for wine lovers. Here, modernity and ancient winemaking traditions are tied up and this leaves unforgettable impressions.

Château Buera Winery was founded in 2018 by Goga Maisuradze, the founder of Lopota Spa Resort. He worked relentlessly to expand the borders of the Georgian tourism industry and made a great contribution to the development of the region. He was a dedicated wine entrepreneur and he believed in the great potential of Georgian wine. After his decease, the winery is managed by his family.

Château Buera's winemaking is actively growing and developing while working with our team of motivated and professional young people.

V I N E Y A R D S

Production of our highest quality wine is based on well-groomed vineyards

The vineyards of Château Buera in the Napareuli microzone are spread on alluvial, rocky soils of the Northern slope and expand over 5 hectares of land.

The Great Caucasus Mountains form a barrier that protects Georgia from the cold air of the North and leaves its Western ridge open to warm and humid air coming from the Black Sea, which is an important factor in this region. The grape clusters are protected from extreme temperatures – whether it's heat or cold.

The climate of Napareuli is moderately humid, with mild winters, summers that are not so hot and two rainy seasons in the year. The local micro-climate, the structure of soil, and the harmonious relationship we have with our land – all this promotes the special quality of grape in the Château Buera vineyards.

Since 2021, Château Buera vineyards have been in the process of obtaining official organic certification. By 2024, the first vineyard parcel has achieved this certification, with the remaining vineyards expected to be certified by 2025.

W I N E M A K I N G

The full cycle of Château Buera winemaking – from the approach of minimal intervention in the process of vine growing and winemaking, to the restoration of grapes of rare Georgian varieties – rises from the goal of its founder, Goga Maisuradze – creating high quality reserve Georgian wine.

Château Buera's philosophy of winemaking is based on the preservation of nature, respect for the soil, and the harmonious relationships of humans and ground.

To maintain the integrity of the bunches, they are hand-picked and placed in open boxes. After splitting the grapes, they are placed on a special vibrating table and only the most healthy grains are selected for fermentation. The fermentation process takes place both in stainless steel tanks and qvevris – a traditional method, after which the wine is transferred for ageing to French oak barrels.

A photograph of a wine cellar with multiple levels of arched niches. Each niche is filled with wine bottles stored horizontally. The cellar has a brick floor and a concrete wall. The word "WINES" is overlaid in white capital letters in the center of the image.
